

## Product Editions

### Dynamic Edition for B2B

Mainly designed for **IT Admins** to configure and customize devices for employees out-of-the-box and dynamically over-the-air

- Configure corporate devices out-of-the-box, during initial device setup process.
- Tailor devices to specific vertical use cases.
- Update device configurations anytime & anywhere, over-the-air.
- Enforce robust security configurations even after factory reset.

### Setup Edition for B2B2C

Mainly designed for **Service Providers** to stage devices for repurposing or rebranding for own customers out-of-the-box

- Repurpose or rebrand devices out-of-the-box, during initial device setup process.
- Maintain rebranded software, pre-installed apps and content even after factory reset.
- Make sure device ownership and privacy of consumers are not infringed.

Create the ideal business tool for your organization with frictionless, out-of-the-box setup. Advanced device configuration tailors every granular aspect to your specific needs.

## Tailor-made out-of-the-box

Knox Configure is a cloud-based solution for customizing and staging Samsung devices remotely, right out of the box.

Tailor devices to specific needs and transform them into purpose-built appliances - whether it be a kiosk, a walkie-talkie, a phone for kids or your branded tablet newspaper and more.

On top of your own brand images on boot and home screen, preload apps & content and customize user experience so your devices only work in ways you want, such as triggering key apps and actions with hardware key press, power supply, or with every reboot.

All automatically and frictionlessly applied at device boot-up so your users can jump straight into action.

## Why Knox Configure

### Customized to your brand

Configure every device to display your own brand without unpacking.

- ✓ Replace standard booting & shutting-down animations with your own.
- ✓ Customize your home and lock screens to display your own images - including support for DeX mode screens.
- ✓ Automatically deploy apps, content & shortcuts at the exact location of your choice on the home screen.

### Tailored user experience

Custom build every device to only work in ways you want them to be used.

- ✓ Automatically launch a key app on every reboot.
- ✓ Remap hardware keys for quick app launch and commands in one touch.
- ✓ Automatic device on-and-off based on power supply.
- ✓ Single app mode to use devices as dedicated kiosks.
- ✓ Customized device actions for specific conditions (e.g. run a retail app at 9 AM)

### Frictionless setup

Set up all devices at boot-up to let users jump straight into action.

- ✓ Automated device provisioning when the end user starts the device for the first time.
- ✓ Streamlined and faster device setup process, such as skipping wizard setup.
- ✓ Pre-configuration of default settings. Remove the need for user intervention.
